

Dr. Wenpeng Luan, expert belongs to the China Recruitment Program of Global Experts (Qianren Program) received a B.Sc. degree from Tsinghua University in Beijing, China, in 1986, a M.Sc. degree from Tianjin University in Tianjin, China, in 1989, and a Ph.D. degree from Strathclyde University in Glasgow, UK, in 1999, all in electrical engineering. He has extensive academic and industrial experience in power system security assessment, system planning, smart grid applications and computer network information security. From 2004 to 2012, he worked for BC Hydro and Power Authority in BC, Canada, As an Engineering Team Lead for BC Hydro's Smart Metering & Infrastructure Program, he played a key role in the whole implementation cycle of this project, from project justification, field trials, procurements and deployment. Starting from Jan 2013, he has been Chief Scientist for Smart Grid in the Smart Grid Research Institute of the State Grid Corporation of China. His special fields of interest include smart metering, smart grid solutions, asset management, control system cyber security and utility advanced applications. He is a Senior Member of IEEE and a Professional Engineer registered at the Association of Professional Engineers and Geoscientists of British Columbia, Canada.
